

PARVATHAVARTHINI P

+91 6383309836 | Coimbatore, India | parvatha2510@gmail.com | LinkedIn | GitHub

SUMMARY

AI/ML developer with hands-on experience building end-to-end machine learning and GenAI solutions across NLP, time-series forecasting, and full-stack applications. Proven ability to improve system efficiency, user engagement, and decision-making through data-driven development. Skilled in transforming business needs into scalable AI solutions using Python, ML, and MLOps tools.

EDUCATION

M.Sc. Artificial Intelligence and Machine Learning (Integrated)	CGPA: 7.59
Coimbatore Institute of Technology	October 2021 – May 2026
XII (Higher Secondary, State Board)	93.1%
Bannari Amman Vidhya Niketan MHSS	2021

EXPERIENCE

Full Stack Developer Intern	KICE Infosystems, Coimbatore, India
June 2024 – November 2024	

- **Tech Stack:** Python Django, HTML, CSS, JS, Bootstrap, MySQL, Stripe
- Developed a full-stack e-commerce platform for flower and gift delivery featuring a 100% responsive UI and secure Stripe-based checkout. Implemented 10+ core modules, including product listing, cart, wishlist, checkout, and order management. Designed database models for products, categories, users, orders, and payments, enabling complete transactional workflow and admin-controlled inventory.

PROJECTS

YouTube Tutor Chatbot — GenAI Lecture Q&A Assistant	Mar 2025 – Apr 2025
--	---------------------

- **Tech Stack:** Python, Streamlit, Google Gemini, FAISS, HuggingFace Embeddings, Whisper, Pytube
- Built a GenAI web app that extracts lecture transcripts from YouTube (captions with Whisper fallback) and generates concise summaries with downloadable PDF notes.
- Implemented RAG with FAISS-based semantic search and dual QA modes (context-based retrieval & general LLM), enabling accurate contextual Q&A and reducing manual note-search time.

Energy Consumption Forecasting & Anomaly Detection	September 2024 - October 2024
---	-------------------------------

- **Tech Stack:** Python, Prophet, LSTM, Isolation Forest, Power BI
- Built time-series models (Prophet, LSTM) achieving 92% forecasting accuracy for hourly energy usage.
- Implemented Isolation Forest to detect anomalies; integrated Power BI dashboard reduced abnormal consumption patterns by 40%.

Fashion Recommendation System	June 2022 - July 2022
--------------------------------------	-----------------------

- Developed collaborative and content-based recommendation models to tailor user product suggestions, increasing click-through rate by 18% and improving product discovery experience.
- Enhanced recommendation precision by 18% using historical purchase data; built a simple web interface for user interaction.

SKILLS

- **Programming:** Python
- **Web & Backend:** Django, HTML, CSS, JavaScript, Bootstrap, SQLite, MySQL, REST APIs, Streamlit
- **Tools & Integration:** Stripe Payment Gateway, API Integration, Git, GitHub
- **Machine Learning:** Supervised & Unsupervised Learning, Neural Networks, Time Series (Prophet, LSTM), Anomaly Detection (Isolation Forest), Recommendation Systems
- **Frameworks & Libraries:** TensorFlow, Keras, Scikit-learn, Pandas, NumPy, NLTK, Pytube, FPDF
- **GenAI & RAG:** Google Gemini API, LangChain, FAISS, Whisper ASR, Hugging Face Embeddings
- **Data & Visualization:** EDA, Data Cleaning, Feature Engineering, Matplotlib, Seaborn, Power BI

AREAS OF INTEREST

- Machine Learning
- Deep Learning
- NLP
- GenAI
- Data Analytics

ACTIVITIES & CERTIFICATIONS

- Cybersecurity Fundamentals - IBM 2025
- Cyber Threat Management - CISCO 2025
